

UUT Report

Station ID: IT-W-7303101
Serial Number: NONE
Date: lunedì 20 marzo 2023
Time: 11:05:18
Operator: ITLAVIT1
Execution Time: 00:00:09.715
Number of Results: 15

Error, Error executing substep 'Run'.
Error 538183 occurred at Error 538183 occurred at an unidentified location

This error code is undefined. Undefined errors might occur for a number of reasons. For example, no one has provided a description for the code, or you might have wired a number that is not an error code to the error code input.

UUT Result: Additionally, undefined error codes might occur because the error relates to a third-party object, such as the operating system or ActiveX. For these third-party errors, you might be able to obtain a description of the error by searching the Web for the error code (538183) or for its hexadecimal representation (0x00083647).

This error code is undefined. Undefined errors might occur for a number of reasons. For example, no one has provided a description for the code, or you might have wired a number that is not an error code to the error code input.

Additionally, undefined error codes might occur because the error relates to a third-party object, such as the operating system or ActiveX. For these third-party errors, you might be able to obtain a description of the error by searching the Web for the error code (538183) or for its hexadecimal representation (0x00083647). [Error Code: 538183, User-defined error code.]
